Example:

The following Example is designed to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods shown and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A	\$642	\$806	\$984	\$1,499
Class R	\$ 92	\$308	\$543	\$1,216

Portfolio Turnover:

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 12% of the average value of its portfolio.

Principal Investment Strategies

The Fund pursues its investment objective by attempting to duplicate the performance of the S&P 500 Index. The Fund primarily invests in the equity securities that are in the S&P 500 Index, including American Depositary Receipts (ADRs), and secondarily in related futures and options contracts.

Under normal circumstances, the Fund will invest at least 80% of its net assets in securities, or equivalents, that are included in the S&P 500 Index. The Fund will not change this policy unless it notifies shareholders at least 60 days in advance. For purposes of this policy, “net assets” includes any borrowings for investment purposes.

There is no guarantee that the Fund will achieve its objective.

Principal Risks

The Fund’s net asset value (NAV), yield and/or total return may be adversely affected if any of the following occurs:

- The market value of securities acquired by the Fund declines.
- The portfolio manager does not execute the Fund’s principal investment strategies effectively.
- Derivative instruments, including futures or options contracts used for asset substitution, do not perfectly replicate direct investment in the Index.
- A company’s earnings do not increase as expected.

You may lose money by investing in the Fund. The likelihood of loss may be greater if you invest for a shorter period of time.

An investment in the Fund is not a deposit of KeyBank or any of its affiliates and is not FDIC insured or guaranteed by any other government agency.

By itself, the Fund does not constitute a complete investment plan and should be considered a long-term investment for investors who can afford to weather changes in the value of their investment.

Investment Performance

The bar chart and table that follow indicate the risks of investing in the Fund. We assume reinvestment of dividends and distributions.

The table shows how the average annual total returns for Class A and Class R shares of the Fund, including applicable maximum sales charges, compare to those of a broad-based market index. We calculate after-tax returns using the historical highest individual federal marginal income tax rates and we do not

reflect the effect of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown. After-tax returns shown are not relevant if you own your Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns are shown for only one class and after-tax returns for other classes will vary. The Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.VictoryFunds.com.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
